

How to download and install CYPE SOFTWARE

CYPE has **more than 70 tools for AEC professionals** that can be used individually or combined within a BIM ecosystem.

1 Download the tool of your choice

We have selected a list with many interesting tools! **Access the list at www.bimserver.center**, choose a tool and click on "Download".

Go to the list

2 Create your free account on BIMserver.center

If you do not yet have an account on BIMserver.center, **create a free account by clicking here.**

3 Run the setup application

Once downloaded, run the program, and choose your preferred language.

4 Follow the instructions on screen

Follow the instructions on the screen, and accept the terms and conditions of use of the software.

5 All set! You can now use the program!

Take full advantage of CYPE's software and **increase the productivity of your work!**

PRO TIP

BIMserver.center is also a CDE!

BIMserver.center, the platform where you can download CYPE tools, is also a CDE (Common Data Environment) with free, cloud-based, unlimited storage space for your projects! Have you created an account yet?
